

The Elevator Historical Society, Inc

21-03 44th Avenue, Suite 206, L. I. C., NY 11101

The time has come to establish a permanent home for my collection of elevator industry artifacts and I have taken the first steps towards that end. In mid to late June we , as an industry we will have our own museum where our rich and varied history can be preserved and available for viewing or research.

Up to this point I have supplied all funding for getting this idea from thought to reality, but for the Society to survive and thrive it will need broad support from you, the members of the industry. To that end we are incorporating the Society as a Not-For-Profit corporation and will apply to the Internal Revenue Service for NFP tax status enabling us to accept tax deductible donations.

In the interim we will gratefully accept any donations with the understanding that they are not, at this time tax deductible.

We are requesting that all industry members consider donating any items that have historical significance such as crosshead plates, old uniforms & uniform patches, annunciators, car switches, dial indicators, old catalogs or advertisements, old convention or sales giveaways, etc., etc..

We will advise all who respond to this letter by e-mail of the grand opening date, we hope to see you there!
